

REDO

RESEARCH ENGINEERING DEVELOPMENT OPERATIONS

www.redosas.com

PRODUCTS

- Reinforced Thermoplastic Pipe (RTP)
- Coiled Line Pipe (CLP)
- Non-metallic flexible pipes (PA, HDPE, PP)
- Supply of valves and fittings

PIPELINE REHABILITATION SOLUTIONS

Tight Fit Lining

Non-Metallic composite overwrap repair (NCO)

In Lining Flat (ILF)

SPECIALIZED SERVICES

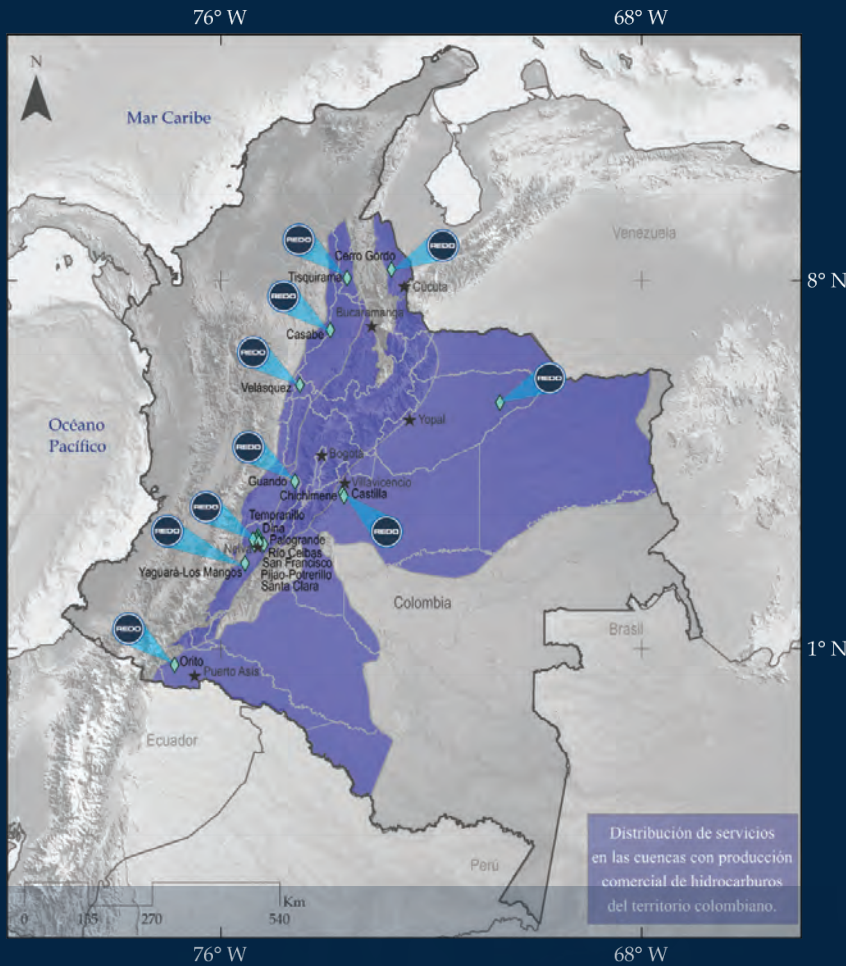

- Integrity inspection of static and surface equipment.
- Application of mechanical reinforcements with polymers and/or composite materials.
- Pipeline cleaning and internal pipeline rehabilitation services using thermoplastic polymers (HDPE, PA12, PP)
- New materials development
- Pipeline Pigging

COMPETITIVE ADVANTAGE

- Corrosion free
- HDPE: $1.25 < PH < 14$
- Free of incrustations
- Increased chemical resistance
- Increased abrasion resistance
- Greater resistance to erosion
- Increased production efficiency
- Less logistics required for transportation
- Inspection and maintenance free
- No cathodic protection required
- Lower CAPEX
- Lower OPEX
- Higher life cycle value

REDO PROJECTS IN COLOMBIA

OUR CLIENTS

- Ecopetrol S.A (National oil company, Colombia)
- Parex Resources
- Perenco
- Mansarovar Energy
- Gran Tierra Energy
- TGI
- Confipetrol
- Wattle Petroleum

INTERNATIONAL STRATEGIC ALLIANCES

- EXTRUCOL
- UIS
- SOLUFORCE
- PRIMUS LINE
- FOCO
- JET FLEXX RLP
- VATAC

- Pipeline rehabilitation using flexible pipe technologies
- Marketing, technical assistance and installation of flexible pipes
- Non-metallic reinforcements (3000 psi)
- Supply of valves and fittings
- Corrosion and integrity assessment and diagnosis
